

# Surreal Photography

Year 9

Create a final piece using Photoshop of yourself in a landscape that is not a normal landscape you would be in.

Make sure you are to scale within the landscape.

Alter your photograph so you at least one extra or replaced body part. This could be a leg, arm, horns, wings, spikes etc. You could replace your head with an animal head etc.

You may get your landscape and body part from the internet but you must arrange and direct the photograph of you with a partner.
